It was inflated with the lightest of its gasses which chemical skill could A produce, and it rose with amazing ve. er stratum of cloud more than a thousand be feet thick. Emerging from this, the e, sun shone brightly on the air-ship; be the sky overhead was of the clearest is and deepest blue, and below lay cloudland—an immeasurable expanse of ce cloud whose surface looked as solid as that of the earth not wholly lost to be view. Lotty mountains and deep, if dark, ravines appeared below the peaks and sides of those cloud-mountains next the sun, glittered like snow. but casting shadows as if they werelo solid rock. Up rose the baloon with tremendous velocity. Four miles above earth a pigeon was left loose; it dropped down through the air as if it hadn is been a stone. The air was too thinle to enable it to fly. It was as if a bark! laden to the deck were to pass from! the heavy waters of the sea into an' lo sink at once in the thinner water. Up, up still higher. What a silence profound! The heights of the sky were as still as the deepest depths of the ocean, where, as was found during the search for the lost Atlantic Cable, the fine mud lies as unstirred from year to year, as the dust which im perceptibly gathers on the furniture of a deserted house. No sound, no lifeonly the bright sunshine falling thro a sky which it could not warm Up—five miles above earth!—higher than the inaccessible summit of chimborazo or Dawangiri. Despite the sunsnine, every thing freezes. The air grows too thin to support life even for a few minutes. Two mer only are in that adventurous balloon -the one steering the air-ship, the other watching the scientific instru ad at a ments, and recording them with rapidity bred oflong practice.
